

## MEMORANDUM

**TO:** Chair  
Hutt Valley Flood Management Subcommittee

**Copied To:** Councillor P Glensor  
Councillor P Lamason  
Councillor S Greig  
Members of the Community and Infrastructure Services  
Committee

**FROM:** Councillor M Shierlaw  
Chair of the Community Infrastructure and Services  
Committee  
Hutt City Council

**DATE:** 2 March 2011

**SUBJECT:** AGENDA ITEM FOR HUTT VALLEY FLOOD  
MANAGEMENT SUBCOMMITTEE

At the Community and Infrastructure Services Committee meeting held on 21 February 2011 the Committee resolved the following:

**RESOLVED:** Minute No. CIS 110107

*"That the Committee:*

- (i) *notes that the Greater Wellington Regional Council has acknowledged that the flood mapping results are based on limited survey information (74 surveyed cross sections at 300m intervals). This is acknowledged in the Land Information Memorandum (LIM) information, and on information data sheets. The LIM also makes clear that the flood maps can only provide a general guide to flood extent and depth, and are not an absolute representation of the flood hazard. Because the survey data is based on 300m intervals, it cannot take account of local topography; and*

- (ii) *recommends to the Hutt Valley Flood Management Subcommittee that they undertake a more detailed survey using 3D modelling for the topography of Coast Road, Wainuiomata."*

2

Could you please add this item to the agenda for the next meeting of the Hutt Valley Flood Management Subcommittee that is to be held on 24 March 2011 at Greater Wellington Regional Council commencing at 4.30 pm.

Members of the public have indicated that they will be attending to support the recommendation.

Max Shierlaw

Chair

**COMMUNITY AND INFRASTRUCTURE SERVICES COMMITTEE**
