

Catchment Specific Options

MID WAIWHETU

S1 SOURCE CONTROL

Install rain gardens and swales along roads where practical during re-profiling and upgrading projects. Would have the effect of intercepting stormwater.

Source control

S7 MODIFY SECONDARY FLOW PATHS

Minor modifications to the topography of Mawson Street (e.g. road side berms, changes in level of footpath) to minimise flooding in Hayward Terrace.

S10 BRIDGE RAISING

Increase the area for floodwater underneath bridges, by raising the bridges or excavating into the stream bed and banks.

- White Lines East
- Te Aroha Pavilion
- Te Whiti Park
- Birdwood Road
- Opposite Ronans Avenue
- Rossiter Avenue
- Wyndrum Avenue Reserve
- Norton Park Avenue
- Tilbury Street
- Off Hamerton Street

S8 HOUSE RAISING

Protect existing high risk houses by raising house floor levels above the level of a predicted 100 year flood.

C7 WEED MANAGEMENT ✓

Continue use of existing methods (status quo) (i.e. manual and mechanical clearing, use of diquat).
