

Annual compliance report

Industrial discharges and contaminated sites

Activities this report covers

This report covers compliance monitoring for industrial discharges and contaminated sites for the previous year up to 31 March 2016. Industrial discharges include a wide range of activities e.g. timber treatment, aggregate processing etc.

What we've done

This year we monitored 31 consents relating to industrial discharges:

Complying	Minor non-compliance	Major non-compliance	Total
28	2	1	31

The consent where major non-compliance was observed is addressing issues relating to storage of sludge from settling ponds as part of a new consent application process.

This year we've monitored the following contaminated sites:

Site	Rating	Comments
Mathon Investments	Major-non-compliance	Monitoring bore needs to be reinstated. Abatement noticed issued
MDC Bentley St Gas Works	Minor non-compliance	A Risk Management Strategy needs to be submitted
Davis Sawmilling	Complying	

What we've noticed

Overall the level of compliance (90%) was generally very good.

What we'd like to fix or change

There are no changes proposed for this monitoring programme at this point.
