RE: Order Paper Item No. 4 — Proposed Regional Passenger Transport Plan. Report 06.554. Chris Horne.

Chris Horne maintains that climate change and the availability of oil are the most serious problems facing the region. Increased use of public transport and decline in use of private cars is essential to minimize these factors.

Paula Warren, representing Transport 2000+, feels that the Proposed Regional Passenger Transport Plan should provide a clearer statement of what the options are for passenger transport service standards, what the problem areas are, and how these issues can be addressed.
