

Signatories to the Urban Design Protocol

The leading signatories to the New Zealand Urban Design Protocol come from a wide range of organisations spanning central government, local government, the private sector, educational institutes, professional bodies and other sector groups. Each of these organisations has made a commitment to create quality urban design through their own actions. By setting an example for others to follow, they will make a real difference to the quality of our urban areas.

Signatories as at 5 October 2006: 119
