Contents

1.	Introduction	5
2.	Issues	6
2.1	Issue 1: Increasing demands on energy	6
2.2	Issue 2: Energy efficiency	6
2.3	Issue 3: Greenhouse gas emissions	7
2.4	Issue 4: Renewable energy resources	8
3.	Objectives	9
3.1	Objective 1: Energy	9
4.	Environmental Results Anticipated	9
4.1	AER 1: Dependency on fossil fuels	9
4.2	AER 2: Greenhouse gas emissions	9
4.3	AER 3: Renewable Energy Sources	9
4.4	AER 5: Travel demand management	9
4.5	AER 7: Energy efficient subdivision and development design	9
5.	Policies	9
5.1	Policy 1: Renewable energy production & transmission - Plans	9
5.2	Policy 2: Considerations – renewable energy production & transmission	11
5.3	Policy 3: Considerations – effects on renewable energy production & transmission	12
5.4	Policy 4: Balancing the provision for renewable energy production with the management of its potential environmental effects	12
5.5	Policy 5: Transport energy use and CO ₂ emissions	13
5.6	Policy 6: Considerations – Travel Demand Management	13
5.7	Policy 7: Energy efficient design – district plans	15
6.	Methods	16
6.1	Method 1: Changes - district and regional plans and the Regional Land Transport Strategy	16
6.2	Method 2: Consideration of resource consents, notices of requirement or plan changes	16
6.3	Method 3: Renewable energy production – identification and management	16
6.4	Method 4: Travel demand management	16
6.5	Method 5: Energy efficient design	16
6.6	Method 6: Collection of information on regional energy use	17
7.	Principle reasons for objectives, policies and methods	17
