

MEMO

TO Te Awarua-o-Porirua Whaitua Committee

SUBJECT Update on TAO P Whaitua Engagement

DATE 24 May 2018

FROM Jon Gabites & Suze Keith

Kia ora koutou,

In lieu of an engagement session at the May 10 Committee Workshop, please find following a summary of engagements that have taken place, the key themes raised and next steps. These engagements include our project institutions, rural landowners and Porirua developers involved in the district plan review. You will see that there are some common themes beginning to emerge, such as where's the evidence, what can be done in terms of mitigating land use impacts on water quality, costs and timeframes, and governance/funding solutions. Thanks to those of you who have been able to attend these meetings, we appreciate that not all of you are able to make it to events during the day.

KEY THEMES	NEXT STEPS
Rural Landowners Meeting, 12 February 2018	
Follow-up Q+A Report can be found here , but common themes are evidence, monitoring, land management practices, and good practice by public institutions.	June 27 Meeting planned to present draft water objectives
PCC Councillor Workshop, 26 April 2018	
<u>EVIDENCE:</u> Need for evidence of the cause of the problem <u>MITIGATION IDEAS:</u> the most effective mitigations / changes of practice to solve the problem <u>TIME & COSTS:</u> What are the timeframe and costs <u>OPPORTUNITIES:</u> Where are the opportunities for change practice, including the opportunity to work through the DP review and the Harbour Strategy Committee to align processes	Councillor workshops booked July 26 and November 29
PCC District Plan Developer Group, 20 April 2018	
<u>FUNDING:</u> Alternative funding ideas <u>MITIGATION IDEAS:</u> What tools are available to reduce sediment run off, given they are already deploying good practice? <u>EVIDENCE:</u> How do you know where the runoff is coming from?	Seeking a second session with this group once economic values have been considered (July)
WCC Councillors Workshop, May 10 2018	
<u>EVIDENCE:</u> What are the contaminants / practices that cause the problems? Can we map / model different development designs to identify the impacts? <u>COST:</u> of WS design	Will present again once the recommendations are drafted (July)

GW Councillors Water Sensitive Cities Workshop, May 3 2018

REGULATION & GOVERNANCE: best structures for delivering WS design, who best to lead, where does it sit in legislation; funding models

Regular Whaitua updates via the Environment Committee

Next up we need to explore how much value you can see in holding a wider conversation once your recommendations have been drafted. Near the beginning of this process you shared with us that you are affiliated to these community groups (below). Now that we're entering a stage of having content to discuss with the whaitua community, can you imagine leading a conversation with these groups in order to check the feasibility of the Committee's recommendations?

Obviously any engagement, whether it be by online survey, town hall style, attending existing community group meetings or through social media, for example, needs to be fit for purpose. The project team are able to facilitate these activities, however the conversations are best led by members of the committee. How do you feel about this and do you see relevance to the groups listed below? Let us know any thoughts via email, and we'll also find time in a committee session to discuss as necessary.

Committee Member	Networks	Additional suggestions
Richard Cook	Board member of SNI Wood Council (SNIWC). Chair of the environmental sub-committee.	Council Youth Advisory Group
Warrick Lyon	Porirua Harbour users group	Porirua Harbour Trust
	Titahi Bay boat club	Pukerua Bay Residents Assn
