Maps 61 to 67 show where the coastal marine area and river mouth boundaries are located. For the remaining rivers in the Wellington Region not shown on Maps 42 to 48, the mouth is deemed to be a straight line representing the continuation of the line of mean high water springs on each side of the river at the river outlet.

The coastal marine area means the foreshore, seabed, and coastal water, and the air space above the water—

- (a) of which the seaward boundary is the outer limits of the territorial sea:
- (b) of which the landward boundary is the line of mean high water springs, except that where that line crosses a river, the landward boundary at that point shall be whichever is the lesser of—
 - (i) 1 kilometre upstream from the mouth of the river; or
 - (ii) the point upstream that is calculated by multiplying the width of the river mouth by 5
