Local authority

And **Wellington Water Limited**  
Submitter 151 and Further Submitter FS039

---

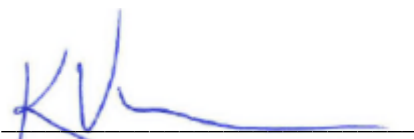

### **Written response to a verbal question from the Hearing Panel in Hearing Stream 2**

Dated 23 April 2025

---

## **Response to verbal question from the Hearing Panel**

1. Wellington Water presented planning and technical evidence, on 11 April 2025, to the hearings panel in Hearing Stream 2 for Plan Change 1 to the Natural Resources Plan.
2. At that hearing, Liam Foster (who presented his technical evidence in relation to Stormwater) was asked by the hearing panel whether the calculations presented in his written evidence (regards costs for stormwater infrastructure upgrades) were based on the target attribute states (TAS) and coastal water objectives (CWO) as notified, or the amendments recommended by Greater Wellington's section 42A reporting officer Mary O'Callahan (dated 28 February 2025).
3. In response to the question, Mr Foster asked if he could review his calculations, before providing a verbal response.
4. Wellington Water received an email from Mr Foster on Monday 14 April 2025, confirming that his calculations were based on the notified TAS and CWO.

Katherine Viskovic  
Head of RMA and Environment  
Wellington Water
